

Quick Fist Clamp

Item #90065

MADE IN USA

Kayak Roof Top Mounting Kit

Instructions

Insert eyebolt through center hole of roll bar mount and tighten in place with washer and nut (see illustration). Repeat.

Feed hose clamp through slots in roll bar mount (just under two round humps-see illustration).

Put rubber strip around roll bar or roof rack and trim any overlap. Then tape to temporarily hold in place. Repeat.

Tighten hose clamp around bar with rubber strip in the center. Repeat.

Put Kayak on roof. "Button" hook into the end hole on the strap (both the upper and lower button must be through the hole); insert hook into eyebolt and put other end over the kayak.

Insert second hook so there is about 2.5-3" (64-76mm) distance between the end of the hook and eyebolt. Stretch rubber and insert in eyebolt. Move hook as necessary to stretch rubber strap to a tight fit. Repeat.

Made in USA

US and Worldwide Patents Pending
UK patent 2403262
