

COMPRESSOR-NEBULIZER SANY+AIR

SANY+AIR is the perfect partner to sanitize any type of surface. It is light, mobile and very useful to use in:

- Schools
- Nursing homes
- Sports fields
- Butchers
- Bakeries
- Families
- Clinics
- Bar
- Hotels
- Hospitals
- Medical centers
- Wellness centers
- Confectionery industries
- Food industries
- Offices
- Shops
- Restaurants
- Airports

All you have to do is connect SANY + AIR, put a good sanitizing product in the container and spray around with its nebulization.

Sany + Air is the progenitor of a new range of Nardi compressors designed for disinfection and sanitization. Thanks to the nebulization of sanitizing liquids it is possible to disinfect any type of environment and surface. Built with all Italian and certified components, it has a very high efficiency and a yield that allows you to work for a long time continuously. The Sany + Air is a low-pressure oil-free compressor equipped with a pressure gun that manages to spray the chosen product with very little air.

QUALITY OF THE PUMPING GROUP

Sany + Air has a small but strong heart, it is made up of an extremely resistant pumping unit. The robust materials used have made it possible to obtain a small compressor capable of working continuously for many hours without any maintenance. In fact, it is a compressor that uses the same technology as compressors built for professional use in the medical sector such as compressors for dentists

EASY TO USE

Sany + Air is an easy-to-use compressor. Once the liquid to be sprayed has been inserted into the tank and the electrical socket has been inserted, it turns on using the red ON / OFF switch and thanks to the pressure reducer on the compressor and the flow regulator, you can decide the intensity of the spray and the quantity of vaporized liquid.

ECONOMIC

Sany + Air is an economic compressor since it was built using components from large series productions. This gave us the opportunity to quickly produce a new sanitization system obtaining a final product with very low costs. The liquid you choose to spray can easily be found on the market following the advice of the World Health Organization. In the case of alcoholic solutions, the nebulization is so efficient that the sprayed product dries instantly.

COMPRESSOR-NEBULIZER SANY+AIR

EFFICIENCY

Sany + Air is the maximum of efficiency. Its peculiarity is that by having a constant spray it is able to homogeneously deposit the sanitizing products on large surfaces. Therefore it does not require drying. Equipped with a 5 meter spiral, it allows rapid and free movement and movement around objects and things. The chosen sanitizing product is not wasted because mixing with air allows a micro nebulization.

The SANY+AIR kit is composed of:

- SILVERSTONE COMPRESSOR WITH DIRECT OUTLET WITH UNIVERSAL TAP, WHITE COLOR
- 230V - 50 HZ MOTOR, ELECTRIC CABLE AND SCHUKO PLUG
- PUMPING UNIT FROM 2800 RPM TO 2 BAR
- 10 m. SPIRAL AIR HOSE AND GUN WITH SANY+AIR VAPORIZER

Noise less than 72 dB

Compressor unit dimensions: Width 33, Depth 15, Height 23 (measures in cm.)

Weight of the compressor unit 7 kg.

- 1 Compressor
- 2 Switch
- 3 Pressure regulator
- 4 Pressure gauge
- 5 10 m. spiral tube

- 6 Liquid flow regulator
- 7 Gun
- 8 700 ml tank for liquid to be sprayed
