

AURORA Universal 6pcs Touch Pad Switch Panel

1.Product Picture

2. Specification

Max Power	720W (12V, 60A)
Input Voltage	12V
Number of circuits	6
Max Current (total)	60A
Max Current (per relay)	30A (included 20A fuses)
Switch Type	Touch Pad on/off with back lit blue LEDs
Stickers	45 Labelled, 5 Blank
Master Switch	Push Button Type, controls all other circuits on/off
Main power lead	6 core 14AWG wire with M8 terminal
Switch Panel Extension lead	2.7m length, 8 core wire with easy threaded terminals
Switch Panel Mounting Options:	Two Piece Pivoting Bracket + double sided tape
Fuse/Relay Box Mounting Options	Integrated mounting holes and screws included
Switch Panel Dimensions: LxWxH	95x65x10mm
Fuse/Relay box Dimensions: LxWxH	159x89x83mm

3. Features

1) Compact Design Touch Pad Switch Panel--All-In-One Kit

Operating voltage 12-24V, max working power 720 watts, 6 circuits rated at 30A each, 6 operation buttons. With high stability and strong anti-seismic capability, ensuring stable performance in any road or environment.

2) Customize your panel--50 universal sticker suit many different accessories

You will clean up all wiring harness and control your device by the panel.

3) Universal Fitment--fits anywhere, Any vehicles

Smaller size switch panel and control box save more space and can be installed in any location you see fit, such as dash panel, dashboard, center console, overhead sunglasses holder, etc. Fit for different types of truck, car, suv, utv, boat, off-road, motorcycle, etc.

4) Easy to install, plug and play

The Plug-N-Play wiring harness with extension cable and the 2 mounting options of the switch pod makes installation much easier. Say goodbye to multiple different mismatched switches and bundles of messy wire.

5) Safety Design

The relays and fuses provides you with a safety environment for all connections. The whole circuit with over-voltage protection, over-current protection, overheat protection and reverse polarity protection.

6) Backlit buttons with auto-dimming feature plus LED indicator lights

7) Master switch turns all six circuits on/off at the same time

8) Fuse and relay box can be remotely mounted ~3m from Switch Panel
